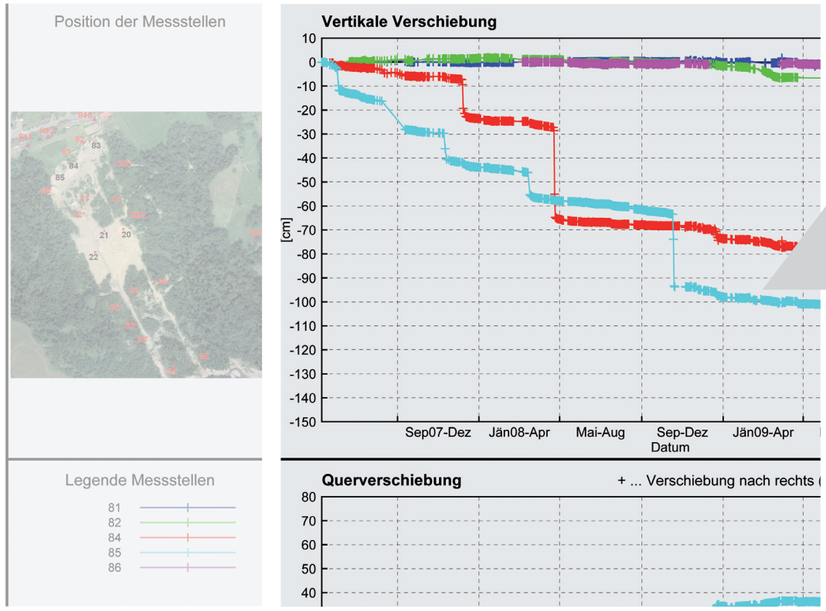
Individual Layouts - without CAD or Spreadsheet Specialists

Design your own comprehensive and clear layouts to create high recognition value. Your customers will appreciate how easy it is to understand and interpret the results.
Graphics can easily be customized to your individual needs without the help of CAD or Microsoft Excel professionals..



Comprehensive Graphics

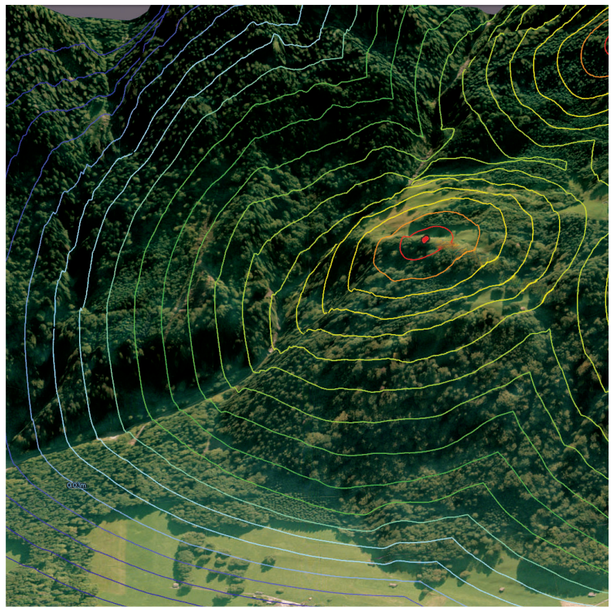
Combine different types of diagrams, data tables, background images, and sketches according to project requirements and simplify the interpretation of highly complex measurement results.
After designing a basic layout once, you can customize the graphics to the individual project requirements while always complying with company standards and corporate design.

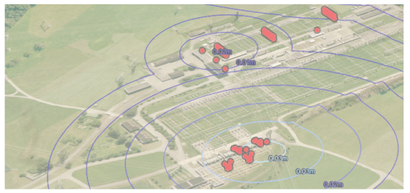
Axis3D Deformation Graphics

Highly efficient generation of professional deformation graphics.

Set your own standards.

Axis3D Deformation Graphics includes a variety of options for the visualization of deformation measurements in 2D and 3D, on the PC or via the Internet.





Generate Graphics Efficiently

Automate your workflow with Axis3D Deformation Graphics - from importing monitoring data to generating the final plot.

Boost your efficiency and create professional graphics combining different data types in a single diagram.

Data can be structured to suit your needs and with the intuitive user interface you are productive from day one!
